Jeep wrangler chip

Jeep Wrangler Performance Chip. Vehicle Year: Required Choose Options Other Not Listed. Engine Size: Required Choose Options 4. Current Stock:. Quantity: Decrease Quantity: Increase Quantity:. Learn how we do it. We know this because we're experts in this industry. In addition to that, our team also develops products for many big name engine performance companies. We know what we're doing. You can rest assured knowing that you're purchasing directly from experts and engineers, not just resellers or copy-cat companies that use low quality materials in their products. What's included my Vertex Performance Kit Purchase? Proudly Made in the USA! Our products are proudly made in the USA. We manufacture all of our products out of our Florida facility. We're proud to use premium top quality materials in our products. Don't buy from companies unless they can guarantee their products are made in the USA. Your car isn't cheap, so why install performance products with cheap materials in it? Will the Vertex Module void my vehicle's warranty? Our product should not void your vehicles warranty. In fact, the Magnuson-Moss Warranty Act protects you against having your warranty voided due to aftermarket parts! The vehicle manufacturer cannot void your entire vehicle's warranty due to aftermarket accessories! TIP: You can and should always remove any and all aftermarket performance parts prior to visiting the dealer for service, with Vertex, it takes less than 2 minutes to remove. What kind of "Expert" Support is included? Every purchase comes with FREE expert installation support. The support you will receive will be at the factory level. This means, we will provide installation support for your exact vehicle. Rest assured knowing that we are the only automotive performance company provinding expert support with genuine factory information and diagrams. We can help you locate the exact location of installation on your vehicle with ease. Why haven't you asked for my year and engine size? Don't you need that? For most of our performance modules, we do not need this information. In fact, nearly all performance companies that ask for your vehicle's year and engine size are just trying to convince you that you're purchasing a performance module specific to your vehicle's exact year and engine size. That is absolutely not the case most of the time. Our modules have been tried and tested on tens of thousands of vehicles all over the world and perform amazingly. Unless we specifically ask for your vehicle's year and engine size, you do not need to worry about providing it. NOTE: We may ask you for your vehicles exact year and engine if you request installation support. That is because sometimes vehicles even if it's the same generation and engine size change their module locations. We'll ask only when we need to know to provide expert advice. Why Choose Vertex Performance? Our Vertex Performance Module not only increases your vehicle's horsepower and torque, it also increases it's overall miles per gallon. Our Performance Module unlocks hidden power in your vehicle's engine and increases your fuel mileage. Save Gas Get paid back, everytime you hit the pump! Our performance module increases your fuel milage - this means you'll save money between fill ups at the gas station! Let's look at savings over the course of a year. Now let's take a look at your savings over 5 years of using Vertex Performance. Vertex Performance Modules pay you back! Vertex Performance Modules are an easy decision to make when you're looking to increase performance and increase fuel mileage. It didn't have to be this way, though: Toyota says it is sitting on a four-month stockpile of the chips and will not have to immediately cut production in response to the chip shortages. Another round goes to the preppers. Audi is expanding the e-tron lineup to include a hp electric sedan, the e-tron GT. It will share a platform with Porsche's Taycan and Audi says it'll have miles of range. Even better, there's an RS variant with horsepower and a claimed 3. Mercedes-Benz gave us a look at a lightly-camouflaged prototype of the C-class and confirmed that the the V-6 and V-8 variants that have populated the top of the C-class lineup in recent years will be replaced by four-cylinder engines with varying degrees of hybrid assist. Jeep traditionally uses the Easter Jeep Safari in Moab, Utah, to reveal outrageous off-road capable concepts and restomods. This year the position of honor will go to something we're pretty sure will eventually find its way onto dealer lots: a Wrangler EV concept. Details are light so far, but we spot one electric motor and at least three battery modules in the drawings Jeep has released. Stay tuned to find out how far into the backcountry you can go before you need to start looking for a plug. Toyota has been lagging behind its competitors in the EV game for years, a result of the company's focus on hybrid and fuel-cell vehicles. But now that a commitment to transition to electric vehicles is de rigueur , Toyota is jumping on board with a promise to release two electric vehicles and a plug-in hybrid in Kia is accelerating its previously-announced EV plans. The company promised this week to deliver 11 electric vehicles by , roughly a month after saying it wouldn't achieve that goal until No official word on why the goalposts moved so soon, but could it be to distract us from the fact that the Hyundai-Kia-Apple partnership that seemed so plausible last week is no more? Individual car dealerships have been accepting Bitcoin as payment for years. But the announcement that Tesla had sunk around eight percent of its cash reserves into Bitcoin caused the currency's

price to jump by 10 percent to a record high on Monday. Uber CEO Dara Khosrowshahi dismissed this investment strategy as risky and speculative but said his company would be open to accepting Bitcoin as payment, too. Let's just hope Elon doesn't forget his Bitcoin password. But as the Norwegians have communicated in a series of videos of their own, they're just happy to have another ally in the fight against carbon emissions. Speaking of the fight against carbon emissions: the New York Times reports that thefts of catalytic converters are skyrocketing around the country thanks to the tightening emissions standards that have made the metals contained in the converters more valuable. And a white paper of the week from the Insurance Institute for Highway Safety. The paper finds that though women are at higher risk of injury in certain types of car crashes than men are, the discrepancy is related to differences in the types of vehicles women are more likely to drive and the types of crashes they're more likely to be involved in, and not to physiological differences that make women more prone to injury. After driving km road total, NitroOBD2 adjusts itself to the car, according to the drivers' habits and always keeps remaping the ECU to increase the performance of engine. What does NitroOBD2 make? Thus it keeps the vehicle's power and torque increasing. With the received data from ECU, NitroOBD2 adjusts the boost pressure, quantity of fuel, injection timing and pressure to increase the performance of your car. It works only within the tolerance of the engine. NitroOBD2 finds out the hidden power of your car. NitroOBD2 does not damage the engine and the car computer ECU or not cause any negative effects to the car factory setting. NitroOBD2 does not change any of the settings permanently. And turn the ignition on for 30 seconds. And Turn the engine on. NitroOBD2 settings are optimal and the best for your car. Even the parameters are different for each vehicle, there might not be a need to make an additional adjustment. As a consequence, it changes the whole injection map. EcoOBD2 is the cheap and safe type of tuning. Remapping is a permanent change to your car. This is the expensive tuning and you cannot remove it. After releasing the

buttom, just wait for a while about sec. Each device available for LPG. Does your car have OBD2 connector? On-Board Diagnostics, or "OBD," is a computer-based system built into all and later light-duty vehicles and trucks, as required by the Clean Air Act Amendments of OBD systems are designed to monitor the performance of some of an engine's major components including those responsible for controlling emissions. After this shade tree engineering I have fog lights right where they need to be. Well designed product. Good finish. Nice they come with fine thread machine screws to attach lights to the brackets. Images in this review. They work perfectly and are essential I. I also highly recommend these headlights, super bright, great price. By Jill on January 19, I'm not sure if I missed something somewhere in the product description, but I was under the impression that these were a bolt-right-on conversion bracket. The only reason I gave two stars is because they were reasonably strong brackets that fit close enough to make them work with some modifications. First, the radius cutout on the bracket did not match the radius of the fog light housing, so I had to use a rotary grinder to widen the bracket's radius. Then, in order to correctly center the fog light in the bumper's opening I needed to fabricate spacers under the bracket mounts, otherwise when tightening the bracket it pushed the lights out of alignment. The whole installation took a little over an hour because of the modifications when it should have been a 15 minute job. Update on They r not bolt on product I took me almost hour and half because the brackets are not matching the holes in bumper! I had to use zip tie to align it and tight it down! Disappointed but some how I made it work. Used to install KC fogs in my Hardrock bumper. I replaced the hardware that came with it as the screws just seemed to small. I used some cap screws, washers, and lock nuts from HomeDepot. But you can modify to make them work. Would I recommend? THis bracket works perfectly and the other"Name Brands"

were twice the price. Highly recommend this product. I cannot speak to the ease of installation or sturdiness yet but this are required of you have the 10th anniversary bumper for the Jeep. I did not know that when I purchased the lights originally. They did work though! See all reviews. Top reviews from other countries. I retrofitted some washers but two did require grinding a corner off to get them seated properly. Other than that tip, these work perffctly so far. Report abuse. Does what it is supposed to do and more economical than others. Pages with related products. See and discover other items: jeep wran
