Mercedes benz radio code wait

The car radio code is a security system that protects your mercedes radio from thieves, but if you remove the radio from your vehicle or disconnect the battery, you will need to enter your mercedes unlock code so that the head unit can operate again. If you have lost your mercedes radio code or bought a used car stereo, you can still easily retrieve your code. The car radio code is indicated on many mercedes models on a small white sticker inside the glove box. The unlock code will be labeled "Anti-theft radio code". Enter this code using the preset radio buttons of your mercedes radio. You will hear a beep and then the radio will resume normal functions. If you do not find your mercedes radio code in the glove box, do not worry. You can still recover it. But first you will need the serial number of your mercedes radio. So here is how:. So we'll start by making sure that the car's engine is shut down. You must now have the car radio release keys for the first step. With these car radio removal tools, you will remove the outer cover of your mercedes radio. Now, simply pull the outer cover with these extraction keys. I always recommend using proper tools to remove the mercedes car radio. Many people do not have the car radio extraction tools at home, but these removal tools are relatively cheap and you can order them from amazon. When you remove the mercedes radio from the car without using the extraction keys, do not rush to remove it. You could break the outer plastic or even damage the car stereo wiring. You must use the extraction keys simultaneously and push them in both sides of the mercedes radio to extract it. This is a simple process and you can easily remove the external cover. Be careful not to damage you. Now that the external cover of your mercedes radio is removed, you can see the plastic inside. You can easily remove the inner plastic with your hands. Now, you just have to push up and down, then remove the inner plastic. Normally, it comes out easily, you have to be careful and slow to avoid breaking frames. You can still use two extraction keys and put them at the corners of the radio frames and pull the frame by exerting pressure on the extraction keys. If it still does not work, you will have to remove the metal that holds it inside. To remove the metal clamps that keep your mercedes radio from getting stuck in one position, you will need two clamps. Hold the corners of the frames with these pliers and pull them out slowly. Very carefully, remove it by holding the two forceps firmly with your hands. You will need to remove it using both forceps simultaneously. When pulling it, make sure it is straight, otherwise it could break or get stuck. I always recommend following the instructions in the instruction manual supplied with your mercedes radio. You can find thousands of guides in how to remove mercedes radio using Youtube or google if you want to take care of this task yourself. You can find this serial number on the anti-theft identification card that is usually placed in the glove box at the time of purchase. There are different types of mercedes serial numbers, or as called sometimes the "security code". These are located on the top or side of the car stereo box or printed on the label. As the example shows, this is the information needed to generate the correct car radio unlocking code for you. An example of this would be "PAF", Please see the images below for reference. The serial number is sometimes printed in the metal case, as indicated by the serial number of this mercedes radio. It is essential to ensure that all numbers and letters are correct in order to get the correct unlock code for your mercedes radio. Once you have the information you need, get your mercedes unlock code by filling out the form above with serial number and email address. Almost all mercedes radio codes consist of 4 to 5 digits. This is done by pressing the preset radio buttons corresponding to the code numbers. So the exact process for entering a mercedes car radio code varies from one situation to another. But in most times, you will use the volume or tuner buttons to select numbers, then click the home button or press another button to advance. It is important to know what you are doing before enter the mercedes radio unlock code. We provide unlock codes for 99 mercedes radio models. Mercedes E Class Break. Mercedes E Class Cabriolet. Mercedes E Class Coupe. Mercedes S Class Cabriolet. It may be necessary to reset a Mercedes M Class radio should the radio or battery be disconnected or the battery become completely drained. When the radio receives power again, it will be in a locked and unusable state. Disconnect the negative cable from the battery with a socket wrench and then disconnect the positive cable as well. Wait 30 minutes to allow for the vehicle's emergency power store to discharge completely before proceeding with the project. Reconnect the positive cable to the positive terminal on the battery with a socket wrench and then reconnect the negative cable to the battery. Punch in the five number vehicle security code on the radio keypad. The security code is included with the owner's manual. Call a local Mercedes-Benz dealership and give them the VIN of the vehicle and the radio's serial number to receive the code if the manual cannot be located. The radio's serial number can be found on the identification plate located on the underside of the radio. Pull the knobs off the radio, remove the face plate by prying it off by hand and the radio may be pulled out far enough to read the plate. Cassandra Tribe has worked in the construction field for over 17 years and has experience in a variety of mechanical, scientific, automotive and mathematical forms. She has been writing and editing for over 10 years. Her areas of interest include culture and society, automotive, computers, business, the Internet, science and structural engineering and implementation. Step 1 Disconnect the negative cable from the battery with a socket wrench and then disconnect the positive cable as well. Step 2 Reconnect the positive cable to the positive terminal on the battery with a socket wrench and then reconnect the negative cable to the battery. Step 3 Punch in the five number vehicle security code on the radio keypad. If the wrong code is entered, wait an hour for the error message to clear before trying again. Socket set Security code Radio serial number if needed VIN number if needed Mercedes dealership contact number if needed. Do not attempt to remove the radio and install it in another vehicle. While the security code will unlock it for use in the new vehicle, the security system in the original one will disable the car and it cannot be unlocked without the radio installed. When I turn radio on the word wait apears what. When I turn radio on the word wait apears what do I need to do. The security code needs to entered but the number of retries has been exceeded there is a period of time with the key

 on engine off that needs to pass before the radio will reset so the code can be entered again First, get the radio code. It is a five digit code located on a business size card in the original owners manual. If you don't have it you will have to make a trip to the Mercedes Benz dealership to get the radio code. It is based on the VIN and they can run it for you. Once you have that code, turn the car and the radio on. Once you do that, a solid WAIT message will appear on the radio panel. Leave the car and the radio running for about 20 minutes or so. Some others have experienced longer wait times. The basic thing is that the radio has to be powered up and running. At that point, input the five digit radio code on the radio panel using the preset keys then press the SC button on the radio. That's how you enter the code. You may or may not have to turn the radio off and then back on. Was this answer. Please login or register to post a reply. Sponsored links. Ask a Car Question. It's Free!
