Ninjette forum

A former ninja of the Kaburagi clan, Kozoe Kaburagi fled to avoid living her life under her father's thumb and became an indepentant ninja for hire. Ninjette was born Kozoe Kaburagi of the Kaburagi band of ninjas. When she was a teenager, Kozoe chose to become a "nukenin" runaway ninjas to avoid being a "breeding sow" for the next generation of Kaburagi ninjas. She eventually became a ninja for hire, as well as a problem drinker though this rarely seems to get in the way of her work. In an early job, she captures the superheroine Empowered for some criminal thugs. However, when the criminals fail to show, Ninjette gave up and the two ended up going out for drinks. At some point, Empowered and Ninjette became close friends and roommates. Ninjette continued to be a ninja-for-hire but would often help Empowered when she needed it. She even trained Empowered in various skills, though Empowered proved to be a difficult student. This wiki. This wiki All wikis. Sign In Don't have an account? Start a Wiki. Categories :. I am about to clean out my carburetor from my ninja ex and dont really know how far to open or what to open for that matter. Hi Anthony! Not so much tuning as cleaning. If your bike has sat for more than 3-months, most likely it's got dried petrol clogging innards. Search for "clean carbs ducatiman" for photos and procedures. Originally Posted by NinjaPony. If you are doing this with bike at standstill AFA tuning This best accomplished after a truly precise manometer synch. If engine does not react or falter when a given pilot screw is turned in Prerequisites: Important to assure adequate valve clearances! Check 'em! Attached Images ex I will try driving and going to 2nd gear, I haven't tried that yet. I haven't messed with anything other than adjusting the bar to better fit my foot. As mentioned, "positive neutral finder" feature won't allow shift into 2nd-gear unless rear-wheel is spinning. Clutch is on right side of bike controlled by left handlebar lever. Do you mean gearbox shift-lever on left side of engine? Why did you adjust it? Improper adjustment will prevent clean shifts. Should have set so shift-rod is exactly degrees to each of little arms at each end. One arm connects to foot-pedal and other arm connects to gear-box. I need a group of local ninja riders to maybe check her out. Your carbs need more thorough cleaning. Outlined above. Many great mechanics. Who can remove engine in less than minutes. Who can rebuilt engines in less than day. Have had to remove their carbs x for ever deeper cleaning before their bikes ran great. I suggest you do it 1st time around. Well, 2nd time now. Here's some photos of what's involved. Need to scrub out all hidden secret passages in carb-body. The solution to your carb problem is simple. Remove the carbs from your bike, ship them to Ducatiman. Send him some money via Paypal and He will quickly strip them clean them adjust them and send them back to you. You will have a bike that runs like new if your valves are adjusted properly. Ship your carbs to Ducatiman, I was doing the same exact thing as you with no results. It is a super fast turn around. It was honestly the best money I have ever spent on the bike. Until you get everything you need to do a full carb job yourself I would rely on someone more experienced the same way I am. All times are GMT The time now is PM. Contact Us - ninjette. User Name. She's dirty though, but thats ok. Means she works for a living Kind of a hot mess, as I have USB cords scattered to power my camera, on the go. Will re-route them soon. A few other minor odds n ends to clean up, bu That's nice paint job!!! Might want to power camera from headlight circuit. Oh ,thank you! Will definitely look into it. Especially now that I have 3 cameras onboard front, rear facing, and helmet. How would you recommend, going through the wiring? Regular soldering, and heat shrink? As far as the vinyl I'm going to keep it two toned. Or I may do something all together different. Most don't know it, but half of the vinyl was actually sucked onto the plastic, by vaccuum forming. I had mediocre results, as I only had a 2 x 4 ft table, a small shop vac, and harbor freight heat gun.. I should have it together in a few weeks, and post up the specs, and videos. I think automotive people who wrap bikes, are thinking in automotive, and not plastic applications. I've seen so many youtube channels, where they heat the vinyl, stretch it, but don't have vaccuum. So they think of it in auto terms.. I'm trying to change that. Here is a few crappy, in garage, no light, actually 1 photo has garage lights on just LED. I'm pretty sure I posted the basics somewhere in the forum?? So when I replaced the windscreen, I sanded down the inside, and outside. Then installed window cling film the frosted type on both the inside and outside of the windscreen. It's really opaque, and the led placement above instruments, just glows the screen up. Even during the day. Lights are wired to brake lights, so when I brake, all leds turn RED I have better pictures during evening, that are gorgeous, I'll have to post up when I find them on PC. I haven't adjusted color on the photos, so the intensity to real life is not the same, nor is color. Next plan is to sand the bottom edge, and top edge of windscreen, and polish, and install LED on bottom edge. This way the leading top edge will glow. Originally Posted by GAU Thanks for the info! I'll see if I can get that rewiring, and wire routing this weekend. I don't like my waterproof camera box having unsealed hole for USB power cable. I really like riding in rain! I'm going to experiment with opening up old battery, hollowing it out, and connecting power wires inside it. By using some ribbon cable to make connection, I think I can close lid over it and still have water-tight seals. Rain riders unite! Im more comfortable in the rain on a bike, than I am in a car, in the dry. Always something new to learn, observe, or practice in the rain. Still a beautiful day, just wet! Rainy ride day! I love it. Nice looking ride C. I don't like riding in the rain. All times are GMT The time now is PM. Contact Us - ninjette. My dirty commuter, User Name. Remember Me? Mark All Threads Read. Thread Tools. Ninjette and Empowered met when Ninjette was hired to subdue Empowered and deliver her to some criminals. Ninjette accomplished the subduing easily, but no one arrived to pick up Empowered. Disgusted with her employers, Ninjette chose to take Empowered to a bar instead. They quickly became best friends. Ninjette now spends most of her time hanging out in Empowered's apartment and helping her deal with the problems in her life. She has taken to training Empowered in aspects of heroing that she herself is an expert at such as physical prowess. Ninjette is a princess of the Kubaragi clan of ninjas. Some time ago she fled the clan and has been in hiding ever since. It has been revealed that the clan only wants her back so she can have children for them. When another clan of ninjas found her and tried to return her to collect the bounty she was overpowered and only escaped thanks to the intervention of Empowered. Ninjette has come to realize she has romantic feelings towards Thugboy , Empowered's boyfriend, and possibly towards Empowered as well
